**Odor Suppressants and Additives**

Micronutrient based formulation for suppressing odor generation from biological processes.

BioStreme # 111F	A powerful foaming agent to provide enhanced coverage and contact time. May be applied using AirStreme foaming equipment. Excellent for use on garbage bins and trash chutes for immediate odor control. Simple and cost effective.
------------------	---

**Automated Misting Systems**

A wide range of atomizing/fogging/misting systems and other application equipment for dispensing or applying AirSolution and BioStreme formulations.

AirStreme Air Misting Systems	AirPro, HCU, & LCU Systems with SU 4&22 litre spray units are most popular for small to medium trashrooms, compactor sites, washrooms, nursing homes, and locker rooms. These systems are programmed to generate a brief air mist every few minutes for reliable continuous treatment.
AirStreme AMS	Mid pressure (200 psi) misting systems for larger commercial sites and light industrial applications. Includes a technologically advanced programmable timer with user interface and multiple inputs to handle a wide variety of operational requirements. For applications up to 50 nozzles.
AirStreme Fan Dispenser	Discrete battery operated units for continuous odor neutralization in small spaces such as entry ways, garbage chute rooms, washrooms and corridors.
AirStreme Foam Applicator	A simple economical foamer. Simply pour our concentrated foaming product into the 2L reservoir and connect the sprayer to a standard garden hose. The foamer is specifically calibrated for use with BioStreme 111F. A minimum of 40psi water pressure is required for proper operation.
AirStreme Foam Station	A sturdy and reliable foaming system for commercial and industrial areas requiring direct application of a foaming solution. Can be used indoors or outdoors, wherever odors are a problem.

### Odor Control Specialists for Today's Environment

Welcome to the most **extensive array of odor control systems and solutions for Commercial, Municipal and Industrial applications.** At Ecolo we strive to provide products and services that meet the individual needs of our customers. With more than 80 unique formulations and engineered application systems at our disposal, we are confident that we can assist you with all your odor control needs.

### About Ecolo

**Ecolo began in 1973 as Ecolo Worldwide,** a privately held Canadian company focused on providing odor control products and services to local markets. From its inception the company grew to an internationally recognized leader specializing in the odor control field. In 2001, the company expanded once again through the acquisition of NuTech Environmental, a U.S. based leader in industrial odor control equipment and solutions.

Today the Ecolo brand has more recognized domestically and internationally than ever before. With a global network of over 100 distributors servicing customers in more than 40 countries makes Ecolo the specified leader in Odor Control Technologies.

### Quality Service

For more than 20 years, **Ecolo customers have bought with confidence,** selecting from among the finest, most reliable products available while receiving unparalleled customer service. At Ecolo we pride ourselves on our ability to provide efficient and effective solutions for our customers. Our customers remain the focus of our business across all departments and divisions from research and development to order fulfillment. It is through this relationship and strict code of ethics that we continue to grow and develop new relationships.

### Systems

Our complete line of application systems, related parts and accessories have been specifically engineered to apply our solutions and can be adapted to meet the requirements of your site.

• **Misting/Fogging Systems**

• **Topical Applicators**

• **Foaming**

### Solutions

A collection of more than 80 different formulations are available to address the needs of a variety of odor issues. Our team of trained professionals can work with you to provide the optimum formula for your specific needs.

• **Neutralizers**

• **Reactants**

• **Suppressants**

### Garbage/Recycling Rooms

Convenient, effective and economical. We reduce nuisance odor complaints by misting AirSolution odor neutralizers in your enclosed trash, recycling and/or compost rooms.

### Hospitals

AirSolutions and specifically AirSolution Autofresh 530 Odor Neutralizer eliminate malodors from waste and autoclave processing areas.

### Restaurants, Hotels & Shopping Centers

Effectively enhance the atmosphere in retail spaces, reduce unpleasant odors in the food service industry, as well as suppress malodors such as smoke in the hospitality sector.

### Public Washrooms

AirStreme Air Misting Systems and AirSolutions continuously and effectively neutralize the odors associated with public washroom areas and locker rooms in gymnasiums and recreational facilities.

### Compactor Sites

Compactor rooms and sites create a unique set of odor control requirements. HLS Ecolo offers a full range of neutralizers, reactants and biological odor suppressants to meet the specific odor control needs of these systems.
